

CERTIFICATION

Gemini Sign Products and raw materials utilized are fully compliant with the following EU regulations and directives:

REACH and SVHC

Registration, Evaluation, Authorization and Restriction of Chemicals (REACH) is a European Union regulation dated 18 December 2006. The aim of REACH is to improve the protection of human health and the environment by identification of the intrinsic properties of chemical substances. It is the strictest law to date regulating chemical substances and will affect industries throughout the world. REACH entered into force on 1 June 2007, with a phased implementation over the next decade. The regulation also established the European Chemicals Agency, which manages the technical, scientific and administrative aspects of REACH. REACH applies to all chemicals imported or produced in the EU. REACH also addresses the continued use of chemical *substances of very high concern* (SVHC) because of their potential negative impacts on human health or the environment.

RoHS

The Restriction of Hazardous Substances Directive 2002/95/EC, (RoHS 1), short for Directive on the restriction of the use of certain hazardous substances in electrical and electronic equipment, was adopted in February 2003 by the European Union. The RoHS 1 directive took effect on 1 July 2006, and is required to be enforced and became a law in each member state. This directive restricts (with exceptions) the use of six hazardous materials in the manufacture of various types of electronic and electrical equipment. RoHS is often referred to as the "lead-free directive".
